

Perunika (*Iris germanica*, L.)

Perunika je poznata po elegantnim cvjetovima.

Rizomi nekih vrsta koriste se u parfemima. Biljka je otporna i lako se širi. Često se nalazi u vrtovima i prirodi.

Ime je dobila po grčkoj božici duge Iris zbog raznolikosti boja. U Hrvatskoj je perunika i nacionalni cvijet.

Iris is known for its elegant flowers. The rhizomes of some species are used in perfumes. It's a hardy plant that spreads easily, and it's commonly found both in gardens and in the wild.

Its name comes from Iris, the Greek goddess of the rainbow, reflecting the wide variety of its colors. In Croatia, the iris is also considered the national flower.
