

Dragoljub (*Tropaeolum majus*, L.)

Dragoljub je ukrasna biljka žarkih boja. Cvjetovi i listovi su jestivi i imaju blago pikantan okus. Bogat je vitaminom C. Koristi se u salatama i kao prirodni antibiotik. Lako se uzgaja i brzo raste.

Nasturtium is an ornamental plant known for its bright, vibrant colors. Both its flowers and leaves are edible and have a mildly peppery taste. It is rich in vitamin C. It is commonly used in salads and is sometimes described as a natural antibiotic. Nasturtium is easy to grow and spreads quickly.
