

## “Snježna gruda” (“žganec”) (*Viburnum opulus*, L.)

Snježna gruda je grm poznat po svojim bijelim kuglastim cvatovima. Često se sadi kao ukrasna biljka u parkovima i vrtovima. Njeni plodovi su crveni, ali sirovi mogu biti blago otrovni. U narodnoj medicini koristili su se za ublažavanje grčeva. Biljka je vrlo otporna na hladnoću.

Guelder rose is a shrub known for its white, spherical flower clusters. It is often planted as an ornamental plant in parks and gardens. Its fruits are red, but when raw they can be mildly toxic. In folk medicine, they were used to help relieve cramps. This plant is also highly resistant to cold weather.
