

Žuti noćurak (*Oenothera biennis*, L.)

Žuti noćurak cvjeta navečer, po čemu je dobio ime. Njegovo ulje koristi se u medicini i kozmetici. Pomaže kod hormonalnih problema i kože. Cvjetovi su žute boje i vrlo dekorativni. Biljka je dvogodišnja.

Evening primrose is named for its characteristic behavior of blooming in the evening. Its oil is widely used in medicine and cosmetics. It is believed to help with hormonal imbalances and skin conditions. The plant has bright yellow, highly decorative flowers. It is a biennial species.
